

Experiment - 3

AIM: Create an application using Flutter Key Widgets.

Source: Main.dart

- **Code:**

```
import 'package:flutter/material.dart';

void main() {
  runApp(MaterialApp(
    debugShowCheckedModeBanner: false,
    home: Scaffold(
      appBar: AppBar(
        title: Text('Marwadi University'),
        toolbarTextStyle: TextStyle(fontSize: 50, fontWeight:
FontWeight.bold),
        backgroundColor: Colors.yellow.shade400,
        centerTitle: true,
      ),

      body: Container(
        height: 380,
        width: 700,
        margin: const EdgeInsets.symmetric(horizontal: 400,
vertical: 100),
        decoration: BoxDecoration(
          borderRadius: BorderRadius.circular(6),
          color: Colors.pinkAccent.shade100,
        ),

        child: Center(
          child: Column(
            mainAxisAlignment: MainAxisAlignment.center,
            children: [
              Icon(Icons.star,
                size: 50,
                color: Colors.white),
              SizedBox(height: 20), // Space between icon and text
            ],
          ),
        ),
      ),
    ),
  );
}
```

```
Text('Hello From Heavens',  
textAlign: TextAlign.center,  
style: TextStyle(  
  fontSize: 19,  
  color: Colors.white,  
  fontWeight: FontWeight.normal,  
),  
),  
),  
),  
),  
),  
),  
),  
);  
}
```

• **Output:**
